POLLUTION: CAUSES & SOLUTIONS

Understanding the problem — and the actions that can make our planet cleaner.

BE THE SOLUTION, NOT THE POLLUTION

PRESENTED BY: _____

Made with GAMMA

What is pollution?

Pollution is the introduction of harmful substances or energy into the environment, making air, water or land unsafe for living things.

01

AIR

Smoke, dust & harmful gases

02

WATER

Waste & chemicals in water

03

LAND

Litter, plastics & toxic waste

04

NOISE

Unwanted or excessive sound

Pollution harms human health, wildlife, ecosystems and the climate.

Made with GAMMA

MEMBER 1 / AIR POLLUTION

Air pollution

Air pollution occurs when harmful gases, smoke and tiny particles contaminate the air we breathe.

MAIN CAUSES

- Vehicle exhaust and traffic
- Factory and power-plant emissions
- Burning garbage and fuels
- Construction dust and forest fires

HOW TO REDUCE IT

- Use public transport, walk or cycle
- Choose cleaner energy and efficient appliances
- Never burn household waste
- Plant and protect trees

SPEAKER LINE: “CLEAN AIR IS ESSENTIAL FOR A HEALTHY LIFE.”

Made with GAMMA

MEMBER 2 / WATER POLLUTION

Water pollution

Water pollution happens when waste or harmful chemicals enter rivers, lakes, oceans and groundwater.

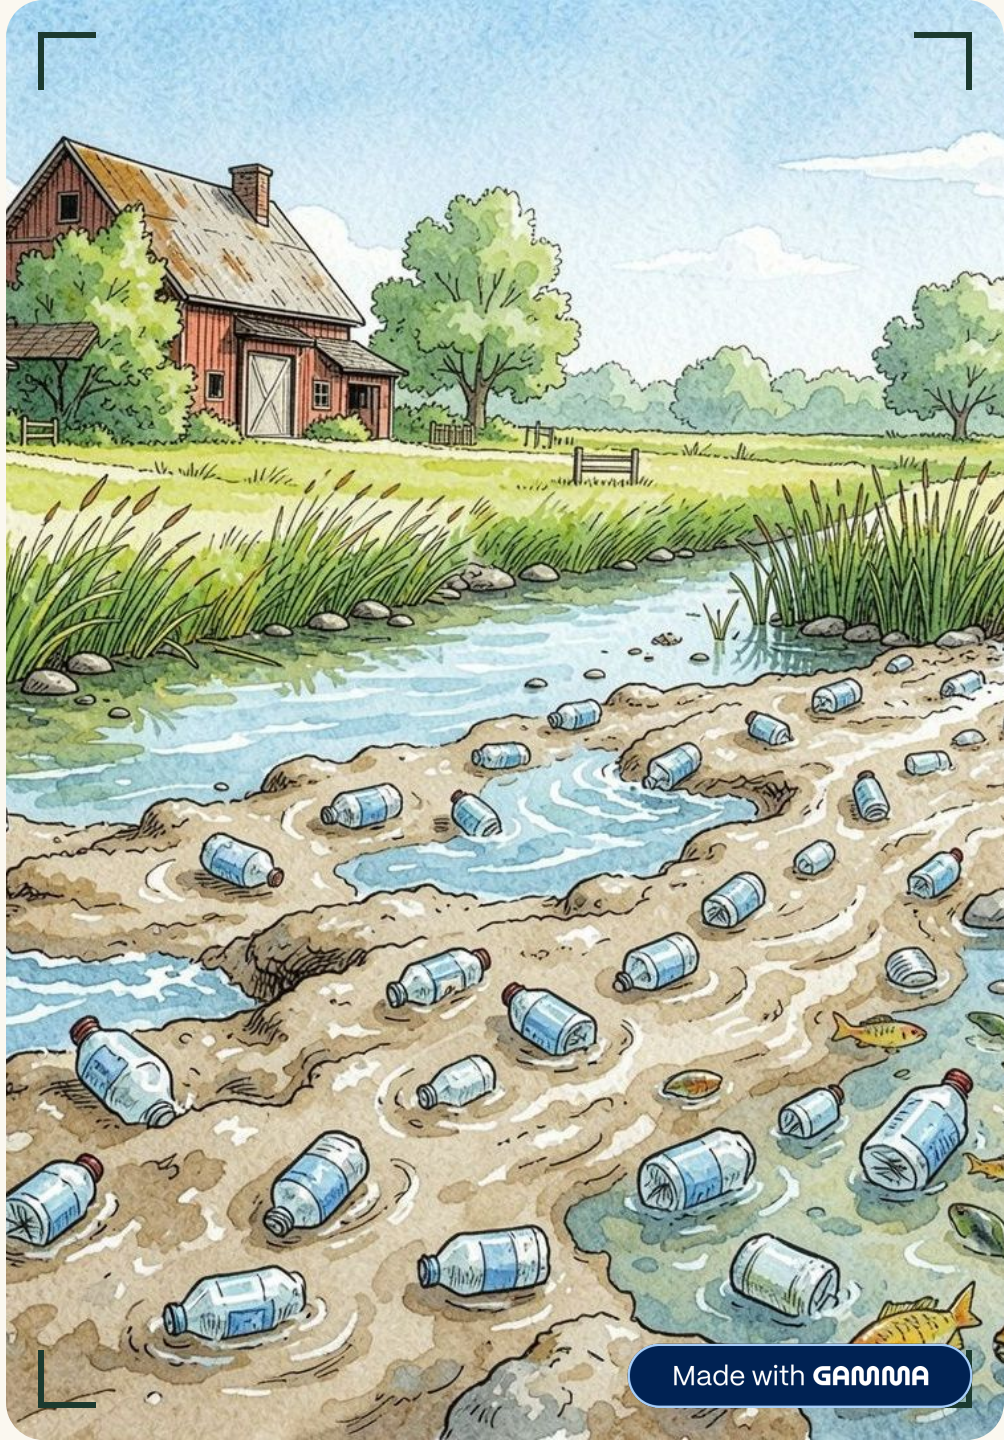

MAIN CAUSES

- Untreated sewage and wastewater
- Industrial chemicals and effluents
- Plastic and other dumped waste
- Fertilisers and pesticides washed from farms

HOW TO REDUCE IT

- Never throw rubbish into water bodies
- Treat sewage and industrial wastewater
- Reduce single-use plastics
- Use farm chemicals responsibly

SPEAKER LINE: “EVERY DROP OF CLEAN WATER MATTERS.”

Made with GAMMA

MEMBER 3 / LAND POLLUTION

Land pollution

Land pollution occurs when waste and harmful substances damage the soil and the places where we live.

MAIN CAUSES

- Littering and open dumping
- Plastic bags and single-use packaging
- Industrial and electronic waste
- Excessive use of pesticides and fertilisers

HOW TO REDUCE IT

- Follow the 3Rs: Reduce, Reuse, Recycle
- Segregate wet, dry and hazardous waste
- Compost kitchen and garden waste
- Dispose of e-waste safely

SPEAKER LINE: “A CLEAN ENVIRONMENT STARTS WITH RESPONSIBLE WASTE DISPOSAL.”

Made with GAMMA

MEMBER 4 / NOISE POLLUTION

Noise pollution

Noise pollution is unwanted or excessive sound that disturbs people and animals.

MAIN CAUSES

- Traffic and unnecessary honking
- Loudspeakers and loud music
- Construction and industrial machinery
- Aircraft and crowded public spaces

HOW TO REDUCE IT

- Avoid unnecessary honking
- Keep music and speaker volume low
- Follow local noise limits and timings
- Protect quiet zones near schools and hospitals

SPEAKER LINE: “A QUIETER COMMUNITY IS A HEALTHIER COMMUNITY.”

Made with GAMMA

Small actions. Big impact.

We can all help reduce pollution through everyday choices and community action.

1

PLANT

Grow and protect trees

2

SAVE

Conserve water and electricity

3

REUSE

Reduce waste; recycle correctly

4

TRAVEL

Walk, cycle or use public transport

5

SPREAD

Encourage others to protect nature

“Protecting the environment is everyone’s responsibility.”

Made with GAMMA

BE THE SOLUTION, NOT THE POLLUTION!

Save Earth. Save Life. Build a cleaner future together.

THANK YOU!
